EXOSTAR

Release Notes

Managed Access Gateway

Version 7.8

Final Edition (Sept 30th , 2024)

This edition applies to the current release of Managed Access Gateway (MAG) and to all subsequent releases and modifications until otherwise indicated in new editions.

Features and Enhancements

Items	Description	Case ID
1.	Service Provider Applications upon request will now be able to switch their mode of operations to a FedRAMP-compliant standard where Personal Identifiable Information (PII) and Privilege user's access and controls will be enforced. Under the FedRAMP compliant standard, users and admins will need a FIPS 140-2 compliant authenticator to access applications and PII data. Portal Administrators such as Exostar Portal Admins, Service Provider Admins, Adoption admins, and Org steward due to current access privileges will need to obtain a FIPS 140-2 compliant authenticator to maintain their current level of admin access.	MAG-8125
2.	Org Stewards can now accept terms and conditions on behalf of the organizations they manage via an enhanced user experience which makes it easier to review the pending requests.	MAG-7918
3.	Org Stewards can now authorize their users for application access via an enhanced user experience which makes it easier to review the pending requests.	MAG-7917

4.	App Admins who can now authorize their users for application access via an enhanced user experience which makes it easier to review the pending requests.	MAG-7911
5.	Service Provider Admins can now approve user requests via an enhanced user experience which makes it easier to review the pending requests.	MAG-7912
6.	Exostar's internal Portal Admins (EPA) can now approve organizations for application access via an enhanced user experience which makes it easier to review the pending requests.	MAG-7913
7.	We have added a link on the login page to the Exostar OTP policy, which will make it easier to find and review.	MAG-9154
8.	The self-registration process will be re-enabled with the added security mechanism of requiring a registering user to solve a captcha challenge on each registration attempt they make.	MAG-8896
9.	The bulk upload (version beta) has been enhanced to make it easier to get to the upload template as well as the user guide.	MAG-9150
10.	The "Go to MyExostar" help link has been relabeled to "Get Help" to make it easier for customers to identify our help pages.	MAG-9407

Closed Issues / Defects addressed in this release

Items	Description	Case ID
1.	We have improved the error message shown when a user tries to self-register to an existing organization that has opted out of the invitation process.	MAG-7856
2.	We have improved the error message shown, during the self-service identity proofing process, when a user's profile contains invalid data such as the user's name containing unsupported special characters, an empty or null user address, an empty or null region-code and the phone number format being invalid for a US number.	MAG-9351
3.	Deactivated organization admins will no longer be included in emails.	MAG-7801
4.	We have resolved the error that causes a duplicated web page within the original when an organization admin tries to add a new user with access to some of our service provider applications.	MAG-8850

5.	We have resolved the issue preventing Exostar Portal Admins (EPAs) from assigning administrative roles to users.	MAG-6683

Known Issues

Items	Description	Case ID
1.	When reviewing a registration request the SP admin is unable to see if the user has an FIS credential. This is being worked on and will be included in the next release.	MAG-9444
2.	When an org admin with also an adoption admin role on their account approves a user, the request skips the application admin approval step	MAG-9460
