

# Release Notes

## Managed Access Gateway

Version 7.9

### **Draft Edition (March 7<sup>th</sup>, 2025)**

This edition applies to the current release of Managed Access Gateway (MAG) and to all subsequent releases and modifications until otherwise indicated in new editions.

## Features and Enhancements

Items	Description	Case ID
1.	Org Admins and Org Stewards will be required to review and agree to our General Terms and Conditions, MAG service agreement, Privacy policy, and Terms of access at least once every 5 years.	MAG-8874
2.	Exostar employees in MAG organizations that have opted for FedRAMP mode will be required to review and accept the FedRAMP Rules of Behavior at least once a year.	MAG-9186
3.	User accounts will be locked after 100 consecutive failed hardware authentication attempts.	SOTP-2266
4.	In the new request inbox, you can now view requests in batches of 25, 50, or 100.	MAG-9604
5.	In the new request inbox, if there are no pending requests or if your search returns no results a message will display, "No results found".	MAG-9609

## Closed Issues / Defects Addressed in this Release

Items	Description	Case ID
-------	-------------	---------

## Known Issues

Items	Description	Case ID
1.	Some Provider Admins may experience a delay over 30 seconds when opening the provider admin tab.	MAG-9805
2.	The email instructions sent out to SP admins and App admins for subscription approvals are outdated.	MAG-10151

3.	Requests approved by an org admin or app admin with both app admin and SP admin bypass additional approval steps.	MAG-9460
4.	The phone OTP row is duplicated in the new request inbox when the user has multiple phone numbers configured for phone OTP.	MAG-10534
5.	The new request inbox does not list the users' PKI and RIDP credentials.	MAG-9444
6.	The new request inbox has a reduced character limit for the denied request textbox.	MAG-9681
7.	SP Admins can approve requests when the administrator review questions are set to "No".	MAG-9599
