EXOSTAR

MAG Release Notes

Version 8.0

Exostar LLC

Samuel Boateng

Draft Edition (July 24th, 2025)

This edition applies to the current release of Managed Access Gateway (MAG) and to all subsequent releases and modifications until otherwise indicated in new editions.

Features and Enhancements

	Description	Case ID
1	We've added support for FIDO2 FIPS certified security keys in MAG. This will allow users to register and use a FIDO FIPS Security key (such as a YubiKey with FIPS validation) as a second factor for authentication and credential elevation.	MAG-9025
2	The login page has been updated to reflect the latest Exostar branding. This includes an updated layout and styling of the ACCEPTABLE USE POLICY banner.	MAG-10774 MAG-10828
3	The MAG Header has been updated to reflect the latest Exostar branding.	MAG-10829
4	The MAG Footer has been updated to reflect the latest Exostar branding.	MAG-10830
5	We have updated our system-generated email templates to align with the 2025 branding standards. Updated templates now feature the new Exostar logo, brand colors, and standardized layout.	MAG-11038
6	A security notice has been added to the verification method selection screen that informs users that phone-based OTPs are less secure than other available options.	MAG-10953

Defects

	Description	Case ID
1	Fixed the approval instructions included in the user subscription notification email sent to Application Admins (App Admins) and Service Provider Admins (SP Admins).	MAG-10151
2	Fixed the issue where multiple backup OTP credentials were shown as duplicate rows; now a single row is displayed per credential type.	MAG-10534
3	Fixed an issue in the new Request Inbox where approving or denying a request did not load the next 100 requests in the queue for Admins	MAG-10648
4	Fixed an issue where the Acceptable Use Policy was not visible on the MAG login page	MAG-10951
5	Fixed performance issue causing delays of up to 30 seconds when accessing the SP Admins tab	MAG-9805
